Requirements

- •[HostExplorer](#) terminal emulator

- •[SafeNet Authentication Client](#) (look for Start » All Programs » SafeNet when installed)

- •[CISCO VPN client](#) set to connect to port.eis.utoronto.ca

Note: Windows users will need to set the IE browser to trust this site (Settings » Security » Trusted Sites » Add...)

Apply Windows Updates

1. Download and run the [32-bit](#) or [64-bit](#) Service Pack to apply the necessary updates to your HostExplorer software
2. Download and run the [32-bit](#) or [64-bit](#) hotfix

Configuration

1. Copy [ExpressLogonTSO13.ebs](#) to directory
   *C:\Users**userid**\AppData\Roaming\Hummingbird\Connectivity\14.00\Accessories\EB*
2. Launch the program: *Start » Programs » Open Text HostExplorer14 » HostExplorer*
3. In the *Open Session* window, click **Create New Profile** button at upper-right corner

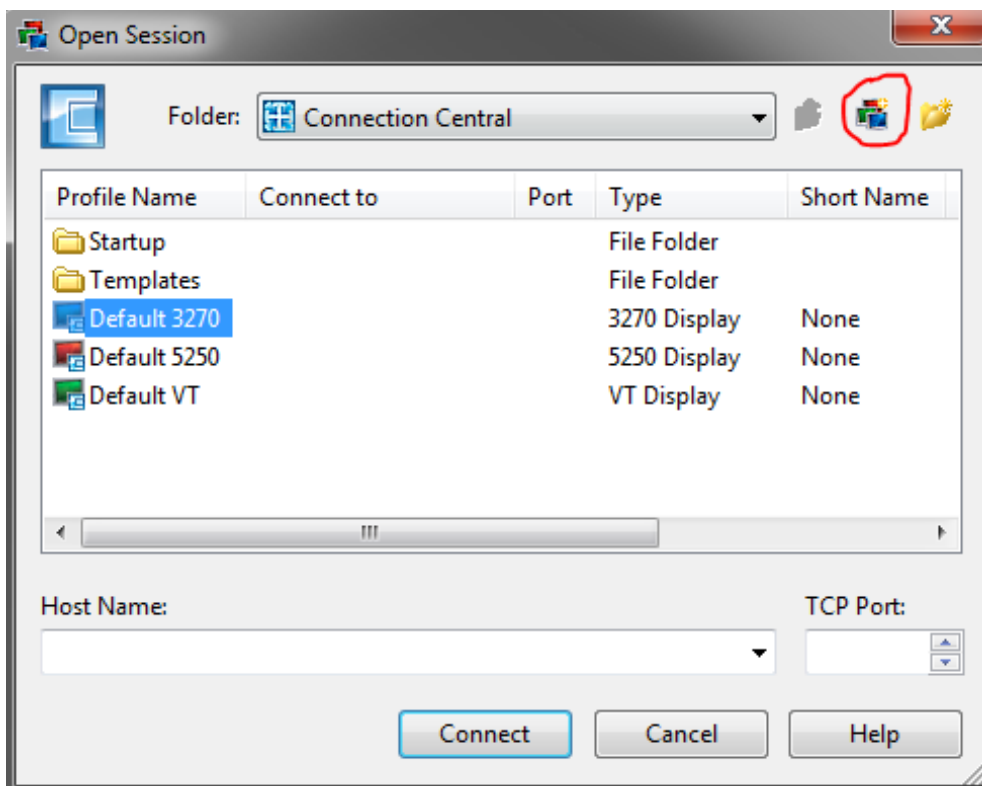

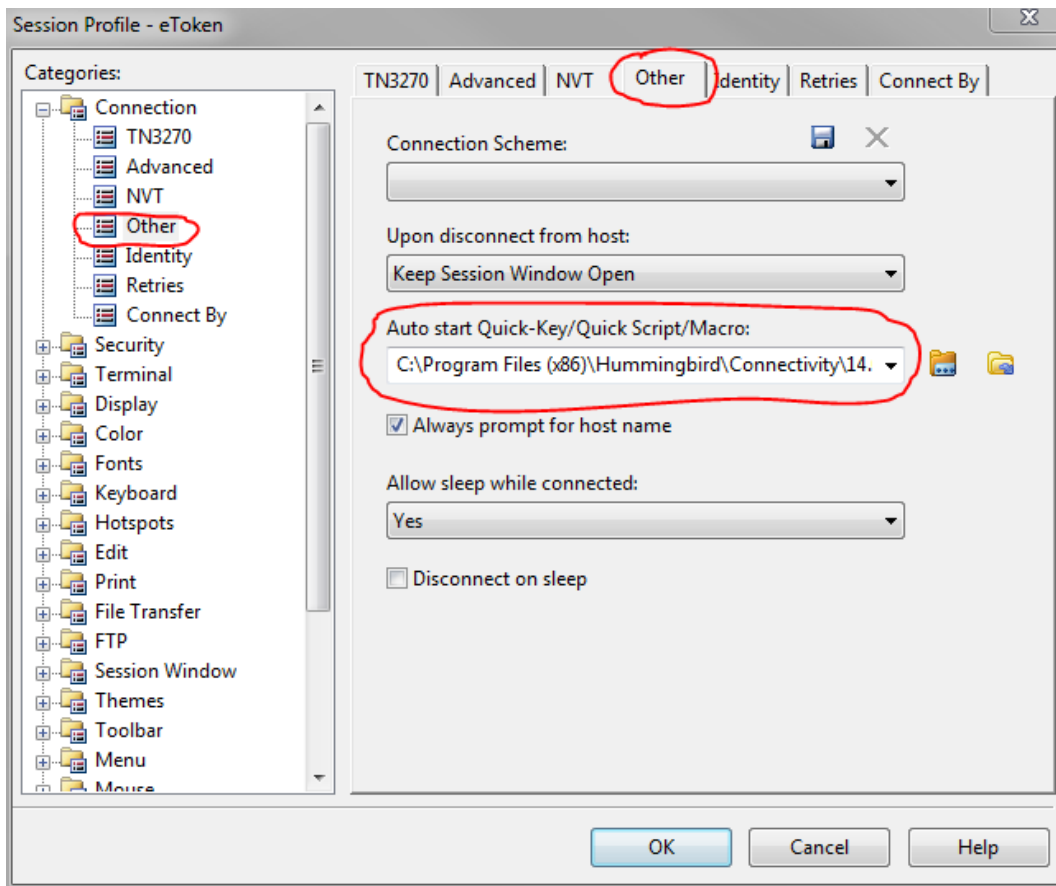

4. In the *New Profile* window, create a *3270 Display* profile type. Set *Hostname* to **zos.adminsys.utoronto.ca** and *Port* to **2024**
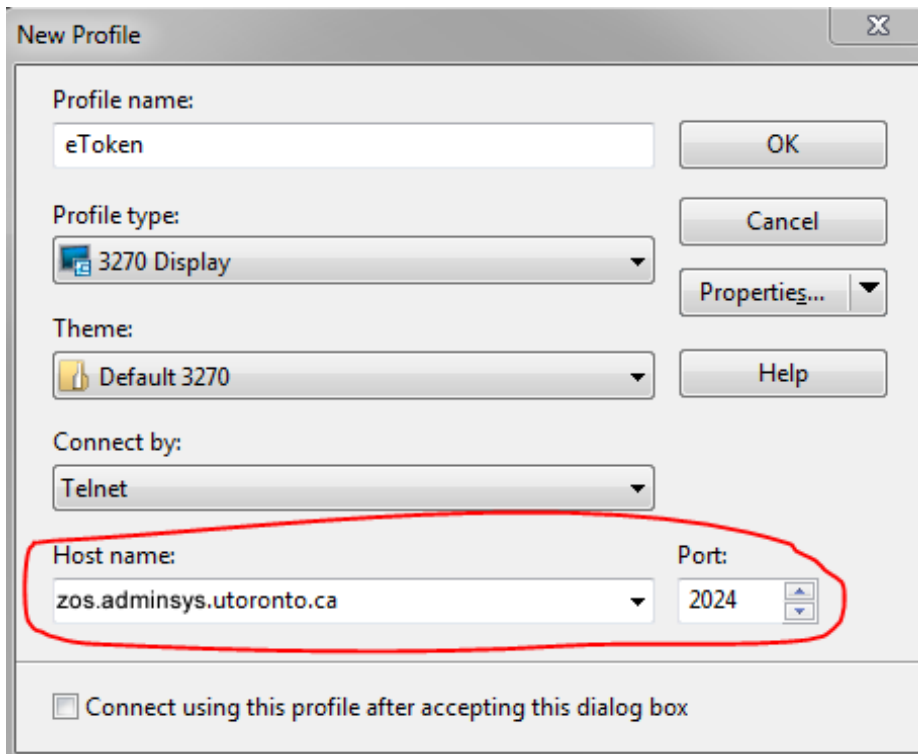

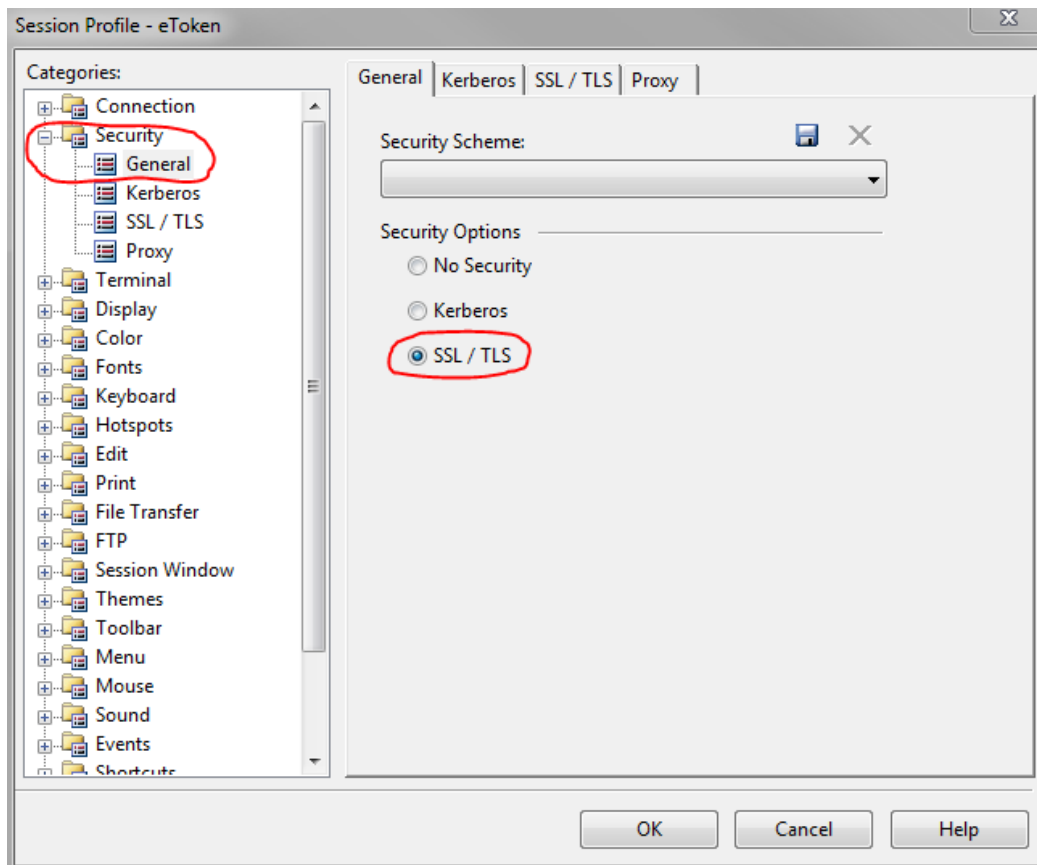

5. Select *Edit » Options » Connection » Identity*. Set *Application ID* to **VTP02**
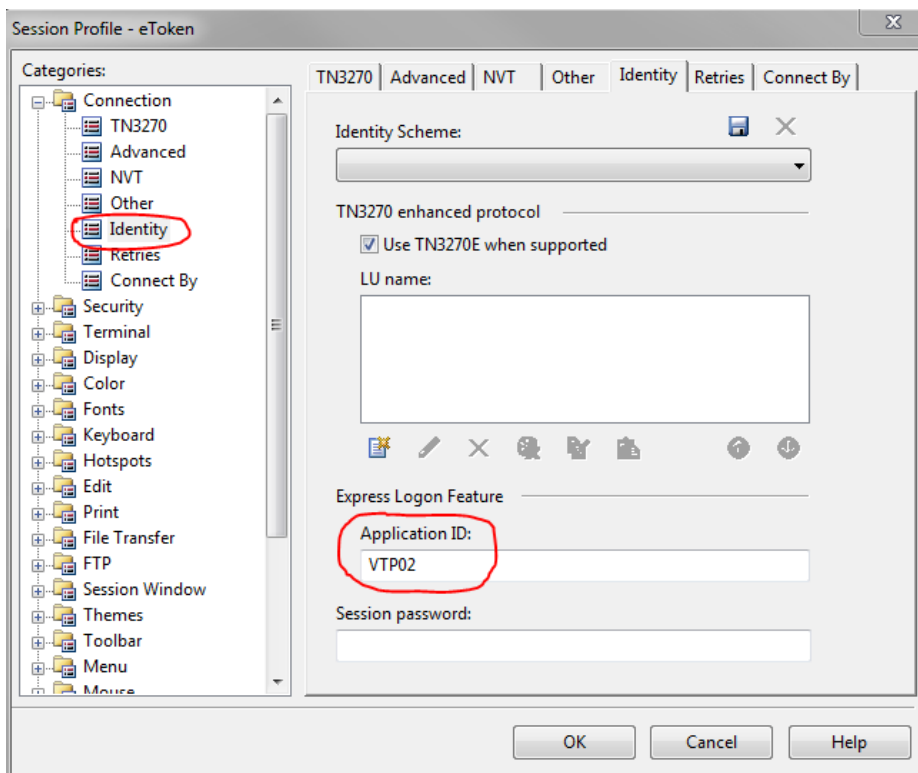

6. Select *Edit » Options » Connection » Other*. In the *Auto start Macro* field, select the location of the *ExpressLogonTSO13* file in Step 1 above.

7. Select *Edit » Options » Security » General*. Select the **SSL/TLS** radio button.

8. Select *Edit » Options » Security » SSL / TLS*. Under *User Certificate Mode* list, select **Prompt for User Certificate**.
